

Children learn through play and active exploration. The suggestions below may be helpful in choosing appropriate toys for holidays and other special times. They include sensory based activities to provide organizing sensation and encourage the development of body awareness, as well as games to promote eye-hand coordination, visual perception and planning. Approximate ages or skill levels have been given to help guide your choices. Many items can be purchased at toy stores or through the catalogues listed. Ask your occupational therapist for help in deciding which games or toys are the best choices for your child.
